INDEX

Volume IV, 1962

Scientific names and titles of books are printed in italics and personal names in capitals

page

Advances in Agronomy, Vols. 13, 14. Edited by NORMAN, A. G. (Reviews) 105, 227
AMES, G. R., Surfactants based on sucrose 64
Annual Review of Plant Physiology, Vol. 13. Edited by MACHLIS, L., and BRIGGS, W. R. (Review) 228
ARTHUR, H. R., and CHAN, Miss R. P. K., a Survey of Hong Kong plants 147
Arvensis, peppermint and spearmint oils, market for 38
Attack on Starvation, by DESROSIER, N. W. (Review) 49

BAXTER, G. D., Kenaf trials in British Guiana 205
Bibliographies 54, 108, 167, 232
Book Reviews 48, 105, 164, 227
BRESLIN, P. J. R., Market for soyabeans, safflower seed, sunflower seed, sesame seed and their oils 87
British Guiana, kenaf trials in 205

Cassia 159
CHAN, Miss R. P. K., and ARTHUR, H. R., a survey of Hong Kong plants 147
CHADHA, Y. R., maize, source of starch 13
Coastal Plains Research Station, work of 181
COLE, R. C., and GREENWOOD-BARTON, L. H., mechanization of fishing boats in the tropics 127
Copra, determination of moisture in 8

Doum palm, leaflet fibre 123

Fibre
  doum palm leaflet 123
  kenaf trials in British Guiana 205
Fisheries, problems associated with development of, in tropical countries 127
Fishing boats, mechanization of 127

GREENWOOD-BARTON, L. H., and COLE, R. C., mechanization of fishing boats in tropical countries 127
GREENWOOD-BARTON, L. H., and INGRAM, Miss Jean S., cultivation of yams for food 82

Hong Kong, survey of plants in: testing for alkaloids, saponins and essential oils 147

INGRAM, Miss Jean S., and GREENWOOD-BARTON, L. H., cultivation of yams for food 127

JARMAN, C. G., and LAWS, Miss V., doum palm leaflet fibre . . . . . page 123

KAY, Mrs. D. E., review of world trade in tomato products . . 216
Kenaf, trials in British Guiana 205

Larousse Gastronomique, by MONTAGNE PROSPER (Review) 49
LAWS, Miss V., and JARMAN, C. G., doum palm leaflet fibre 123

Maize, source of starch in Commonwealth territories 13
Market
for peppermint, arvensis, and spearmint oils 38
for soyabeans, safflower seed, sunflower seed, sesame seed, and their oils 87
for tomato products 216
McFARLANE, J. A., determining moisture content in copra 8
Mechanization of fishing boats in tropical countries 127
Medicinal and Poisonous Plants of Southern and Eastern Africa, by WATT, J. M., and BREYER-BRANDWIJK, M. G. (Review) 164
Mites of Stored Food, by HUGHES, A. M. (Review) 50

Nature and Uses of Modern Fungicides, by SHARVELLE, E. G. (Review) . 106
News Round-Up 3, 61, 117, 177
Nigerian yam starches, experimentally produced 103

Oils
of peppermint, arvensis and spearmint, market for, ... 38
of soyabeans, safflower seed, sunflower seed, and sesame seed, market for, ... 87
ORR, Miss ELIZABETH, and POPE, R., market for peppermint, arvensis and spearmint oils 38

Palm, doum, leaflet fibre 123
Peppermint, arvensis and spearmint oils, market for 38
Phaseolus calcarctus Roxb., rice bean, nutritional value of . . . 163
Plants in Hong Kong, survey of 147
Plastics for storage, particularly in rural Africa 74
POPE, R., and ORR, Miss ELIZABETH, market for peppermint, arvensis and spearmint oils 38
Proceedings of the Science Associotion of Nigeria (Review) 229

Rice bean, *phaseolus calcaratus Roxb.*, nutritional value of . . . 163
Rice growing in Northern Australia 181
Reports published by Tropical Products Institute, 1961, 1962. 52, 107, 166, 231

Safflower seed, soyabeans, sunflower seed, sesame seed and their oils, market for 87
SEAFORTH, C. E., Cassia 159
Sesame seed, safflower seed, soyabeans, sunflower seed and their oils, market for 87
SOUTHGATE, B. J., and WRIGHT, F. N., potential uses of plastics for storage 74

Soyabeans, safflower seed, sesame seed, sunflower seed and their oils, market for . . . . . page 87
Spearmint, peppermint and arvensis oils, market for 38
Staff List 1
Sucrose, surfactants based on 64
Surfactants, based on sucrose 64
Survey of Hong Kong plants: testing for alkaloids, essential oils and saponins 147

Tomato products, review of world trade in 216
Tropical Animal Biology, by KENNEY, A. R., and GRAHAM, V. E. (Review) 165
Tropical Forestry, by TAYLOR, C. J. (Review) 165
Tropical Inland Fisheries, by HICKLING, C. F. (Review) 48
Tropical Plant Biology, by KENNEY, A. R., and GRAHAM, V. E. (Review) 165

WILSON-JONES, K., rice growing in Northern Australia, work of the Coastal Plains Research Station 181
World trade, in tomato products 216
WRIGHT, F. N., and SOUTHGATE, B. J., potential uses of plastics for storage, particularly in rural Africa 74

Yams, cultivation of, for food 127
Yam starches, experimentally produced Nigerian 103

ASSISTANT EDITOR : MISS M. KERSHAW, B.Com.

1962, *Vol. IV*

Contents

ARTICLES *page*

The Importance of Determining Moisture Content in the Grading of Copra, with particular Reference to the Reduction of Insect Infestation. By J. A. McFarlane, *Tropical Pool of Stored Products Specialists* 8

Sources of Starch in Commonwealth Territories: IV—Maize. By Y. R. Chadha, *Council of Scientific and Industrial Research*, New Delhi 13

Surfactants Based on Sucrose. By G. R. Ames, *Tropical Products Institute* 64

The Potential Uses of Plastics for Storage with particular Reference to Rural Africa. By F. N. Wright and B. J. Southgate, *Department of Technical Co-operation* 74

The Cultivation of Yams for Food. By Miss Jean S. Ingram and L. H. Greenwood-Barton. *Tropical Products Institute* 82

Doum Palm Leaflet Fibre. By Miss V. Laws and C. G. Jarman. *Tropical Products Institute* 123

Problems Associated with the Development of Fisheries in Tropical Countries: I, The Mechanization of Fishing Boats. By R. C. Cole and L. H. Greenwood-Barton, *Tropical Products Institute* . . . 127

A Survey of Hong Kong Plants: Testing for Alkaloids, Essential Oils and Saponins. By H. R. Arthur and Miss Rosalind P. K. Chan, *Department of Chemistry, University of Hong Kong* 147

Cassia. By C. E. Seaforth, *Chemistry Department, University of the West Indies* 159

Rice Growing in Northern Australia: Work of the new Coastal Plains Research Station. By K. Wilson-Jones 181

CONTENTS

Kenaf Trials in British Guiana. By G. D. Baxter, *Department of Agriculture, British Guiana* 205

REPORTS OF RECENT INVESTIGATIONS AT THE TROPICAL PRODUCTS INSTITUTE

The Market for Peppermint, Arvensis and Spearmint Oils. By Miss Elizabeth Orr and R. Pope 38

The Market for Soyabeans, Safflower Seed, Sunflower Seed, Sesame Seed and their Oils. By P. J. R. Breslin 87

A Review of World Trade in Tomato Products. By Mrs. D. E. Kay . 216

NOTES

Experimentally Produced Nigerian Yam Starches 103

The Nutritional Value of the Rice Bean, *Phaseolus calcaratus* Roxb. from Northern Rhodesia 163

BOOK REVIEWS 48, 105, 164, 227

STAFF LIST . . . . . I and V (No. 4)

INDEX TO VOLUME IV 243

LIST OF PLATES AND FIGURES

SOURCES OF STARCH IN COMMONWEALTH TERRITORIES. IV: MAIZE

		page
PLATE I Maize field	*facing*	28
PLATE II Examples of the harvest obtained from a field which has been manured and from another which has been cropped for years without being fertilized	*between* 28 and 29	
PLATE III A woman shelling maize	*between* 28 and 29	
PLATE IV Tile-lined concrete tanks for steeping maize at Brown and Polson's Manchester factory. Two wooden towers for the absorption of sulphur dioxide in water to give steeping liquor are shown on the right	*between* 28 and 29	
PLATE V The steeped grains are run off to an attrition mill for partial grinding	*between* 28 and 29	
PLATE VI The broken maize grains are passed through germ separating tanks—in these the germ floats away and the remainder of the grain is drawn from the bottom	*between* 28 and 29	
PLATE VII De-germinated grains are finely ground in these mills. This frees the fibre from starch and gluten	*between* 28 and 29	
PLATE VIII The separation of starch from gluten is effected in high speed centrifugals, seen on the left. The machines on the right are used for concentrating the gluten fraction	*between* 28 and 29	
PLATE IX To get the purest possible starch, a series of hydroclones are used to wash away gluten still adhering to the starch	*between* 28 and 29	
PLATE X Converters for making glucose from maize starch	*between* 28 and 29	
PLATE XI Rotary vacuum filters, fitted with string discharge, for drying the germs	*between* 28 and 29	
PLATE XII Expellers for extracting maize oil from the germ	*facing*	29

PLATES

Potential Uses of Plastics for Storage

		page
Plate I		
Prototype sun-drier	*facing*	76
Plate II		
Experimental airtight storage bin	*facing*	76
Plate III		
Experimental "pillow-tank" for airtight storage	*facing*	77
Plate IV		
Experimental portable fumigation chamber	*facing*	77

The Cultivation of Yams for Food

Plate I		
Tubers of *Dioscorea esculenta*	*facing*	84
Plate II		
A woman hoeing the ground into hills for planting yams	*facing*	85
Plate III		
Storing yams	*facing*	85

Doum Palm Leaflet Fibre

Plate I		
Showing the branched mature Doum Palms, and the young plants, the leaflets of which are used for fibre production	*facing*	124
Plate II		
Transverse section of part of the leaflet, including the midrib, × 20. Note the high proportion of fibres bundles (×)	*facing*	124
Plate III		
Transverse section of part of the leaflet, × 150	*between* 124 and 125	
Plate IV		
Transverse section of doum fibres from a commercial sample, × 150	*between* 124 and 125	
Plate V		
Ultimate fibres, × 50	*between* 124 and 125	
Plate VI		
Ultimate fibre, between crossed polars, × 200. Note the presence of node-like features	*facing*	125

PLATES

The Mechanization of Fishing Boats

PLATE I — *page*

A sailing kotak off Malacca, Federation of Malaya. These boats have either been fitted with inboard diesel engines or replaced by new inboard diesel-engined boats . . . . . *facing* 136

PLATE II

Launching a newly-engined kotak, Malacca, Federation of Malaya . . . . . *between* 136 and 137

PLATE III

A converted kotak on the Malacca river . . *between* 136 and 137

PLATE IV

New motor boat on the Malacca river. The boat is larger than the kotak it replaces, has better accommodation for the crew, and has a larger fish hold . . . . . *between* 136 and 137

PLATE V

Dug-out canoe at Kingston, Jamaica. The traditional dug-out is double-ended; this one, designed for an outboard engine, has been given a transom stern . . . . . *between* 136 and 137

PLATE VI

Guru fishing village, Eastern Protectorate, Aden. The boats are sewn together, no nails being used . *between* 136 and 137

PLATE VII

Malay perahu: the stern has been rebuilt and additional frames fitted to strengthen the hull before fitting the inboard diesel engine . . . *between* 136 and 137

PLATE VIII

Typical Aden sambuk, nailed and fitted with an inboard engine . . . . . *between* 136 and 137

PLATE IX

Diesel-engined replacement for the Malacca drift net building at Muar, Johore . . . . *between* 136 and 137

PLATE X

Lake canoe, Kenya: a bracket has been fitted so that the outboard engine can be mounted on the side *facing* 137

PLATE XI

Mechanics of the Aden Fisheries Department servicing the engine of a boat bought with a Government loan . . . . . *facing* 137

Rice Growing in Northern Australia

PLATE I

Concrete adjustable spilling sluice at tail of rice bay . *facing* 186

PLATES

PLATE II — *page*

Fertilizer Response: Plot untreated with fertilizer alongside fertilized plot . . . . . *facing* 186

PLATE III

Surinam-type puddling roller in action . . . *facing* 187

PLATE IV

Loading rice on the Adelaide river . . . *facing* 187

FIGURE 1

Map of western half of Northern Territory coast line, showing areas of sub-coastal plains land system . 183

FIGURE 2

Territory Rice Limited. Area showing location of coastal plains research and commercial areas . 184

FIGURE 3

Flow and salinity of the Adelaide river, 1958–61, at Middle Point pump site 186

FIGURE 4

Coastal Plains Research Station (Field Plan: Total 100 acres) 191

FIGURE 5

Effects of N and P_2O_5 (as sulphate of ammonia and superphosphate) in yields of paddy. All rates in lb/acre 195

KENAF TRIALS IN BRITISH GUIANA

FIGURE 1

Rainfall data, Lusignan Estate 206

FIGURE 2

Variation in day length 207

FIGURE 3

Number of leaves to first flower. Day length less than $12\frac{1}{2}$ hours 208

FIGURE 4

Stem diameter, plant fibre, fibre yield 210
